About Us

At Maple Ridge Cabinetry, we create unique custom cabinetry that meets your needs and fulfills your vision. We strive to produce cabinetry that reflects your lifestyle and personality and that will serve as fully functional workspaces. A combination of design expertise, quality craftsmanship, and superior customer service makes for an enjoyable and successful experience.

From a simple drawing to a challenging design, our designers are ready to make your dreams a reality. Our superior product will enhance the beauty of your home and provide durability, securing a lifetime of use and enjoyment.

Design

Whatever your design style is, we can work with you to create the look you desire. We have over 40 door and drawer styles, a large selection of moldings, corbels, curio cabinets, hoods, and more to choose from. Our designers work closely with you to create a highly functional and beautiful space. Whether it is workspace in the kitchen, storage space in the dressing room, or even an integrated bookcase and entertainment display area, our variety of design styles, finishes, and accessories, along with our custom capabilities will allow you to have truly unique, quality cabinetry for your home.

Process

We begin by quoting your project. All quotes are done by our design team. If you don't have a design yet, we can help create one. You may send in simple dimensions, a set of house plans, or a cabinet layout. Within a couple of days, we will send a set of drawings and a quote to you. Revisions can be made by marking up the drawings and sending them back to us or by requesting an online meeting with the designer to make changes in real time.

In order to get your project in the schedule, a signed quote and 50% deposit is needed. Before production begins, a set of signed drawings is required. The remaining amount is due before shipping. Most of our orders are shipped on dedicated trucks, ensuring cabinets are handled properly from the time they leave the factory until they arrive at your door.

Old World, Timeless Style

This beautiful Staten Island home has an old world elegance with lots of carved details and onlays. Finished in our 1200 series, the kitchen features a blend of door styles such as Aston, New Orleans, and Oxford as well as pilasters that all coordinate to complete the look. Appliance panels and a grand hood make the utilitarian functions take a back seat to the design of the space.

The bathroom cabinetry is finished in a beautiful neutral gray and have Aston, New Orleans, and Brightwell doors. The dressing area and the vanity are both designed to maximize storage with plenty of drawers.

Opulent Style in Northeast Estate

This grand home is full of a variety of finishes and layers of elegant design. The kitchen has double islands finished in a custom stain with gold trim. The outer cabinets are a custom cream, distressed, 1200 series paint finish. Appliance panels with custom, hand-painted art cover the refrigerator and freezer as well as an armoire-style pantry.

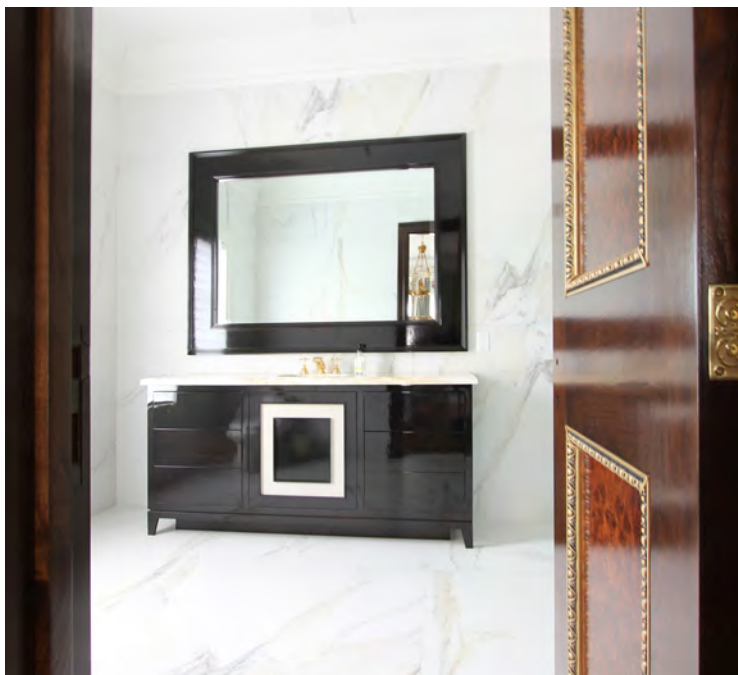

A stylish custom bar is detailed with gold trim on the cabinet above which contrasts with the dark stain. It's movable to allow for flexibility in the ballroom.

The custom Irish Pub bar on the next page has lighted display shelves, plenty of drawers, and substantial trim and detailing to give the whole area a unique feel.

Custom doors with hand-painted art and high-gloss chic, modern vanities enhance the variety and glamour of the home.

Modern in Virginia

This modern home has full overlay custom cabinets with a clean, smooth finish. The kitchen is a classic all-white and the bathroom has a beautiful floating vanity made from walnut with a clear finish.

Southern Comfort, Transitional Style

The comfortable feel of this South Carolina home is what the spaces in this house are all about. Beautifully simple style gives the kitchen a clean look. The cabinetry has Holland doors and drawers and arched toe kick aprons. The island, which utilizes as much storage opportunity as possible, has mission-style corbels and a darker finish which helps anchor the room while the lighted glass cabinets above the upper cabinets draw the eye up.

The butler's pantry is packed with function. From appliances to storage, the whole space is filled with style and finished in a great custom color.

The double vanity in the bathroom has an amazing amount of storage. Finished in a beautifully soft paint color and the Marston door style, there are plenty of drawers to provide top-notch organization.

Simple, Creative Design

The unique island is the focal point in this charming kitchen. The rich, stained wood with the custom blue/gray paint makes for a stunning combination.

Heart of the Home

This traditional kitchen is both bright and cozy. Careful attention to the trim gives the cabinetry a tailored look. Glass cabinetry on either side of the hood breaks up the white solid doors of the upper cabinetry.

Gray and White... a Winning Combo

The understated transitional style for this kitchen lets the fresh color combination of bluish-gray and white make the statement. Glass cabinets above the upper cabinets on each side of the hood have lights to draw the eye up. Carefully applied trim details keep the space looking classic. The custom color island has St. Charles doors while the outer white cabinets have Kirkwood doors.

A Charming Space

This bright and charming bath space in Virginia has plenty of storage space in the custom double vanity. Little cabinet niches on each side of the mirror are unique and provide an area to dress up the space. Mirrored glass upper cabinets help keep the narrow room open while still providing the small space with extra storage.

A Classic Look

An impressive vanity wall in this master bathroom has spacious drawers and a beautiful center cabinet. Finished in Pewter, the glazed finish adds depth to the color.

Soft Colors and Elegant Design

This kitchen is all about elegance. Double islands are finished in a contrasting color from the wall cabinets. Furniture-style cabinets are perfect to disguise the utilitarian nature of a kitchen.

Glamorous Gold

Gold and white make a statement in this unique kitchen. Oversized gold hardware on the Kirkwood doors and drawers matches the other gold finishes in the kitchen. Display cabinets with beadboard backs have wood-framed glass shelves to let the light shine through.

Chic Design

Full overlay, modern-styled cabinetry pairs with a bold chandelier and finishes to create a unique, chic look. Glass door cabinets add interest and appliances tuck neatly in lower cabinets.

A wall of floor to ceiling cabinets provides ample storage and houses the refrigeration and freezer units.

Entertainment Ready

This expansive home bar space has plenty of counter seating and generous display and storage space. The arched upper cabinets are lit and have wood-framed glass shelves. Fluted pilasters flank the walk through and are used as accents throughout the cabinetry.
